

Performing Incident Response and Forensic Analysis (4e)

Fundamentals of Information Systems Security, Fourth Edition - Lab 10

Student:

Alexander Cher-Aime

Email:

acheraime@usf.edu

Time on Task:

3 hours, 22 minutes

Progress:

100%

Report Generated: Monday, April 13, 2026 at 6:25 PM

Section 1: Hands-On Demonstration

Part 1: Analyze a PCAP File for Forensic Evidence

10. Make a screen capture showing the Time Graph.

16. Make a screen capture showing the details of the 2021-Jul-13 15:33:00 session.

Part 2: Analyze a Disk Image for Forensic Evidence

6. Make a screen capture showing the email message containing FTP credentials and the associated timestamps.

Part 3: Prepare an Incident Response Report

Date

Insert current date here.

Incident Priority

Define this incident as High, Medium, Low, or Other.

Medium

Incident Type

Include all that apply: Compromised System, Compromised User Credentials, Network Attack (e.g., DoS), Malware (e.g. virus, worm, trojan), Reconnaissance (e.g. scanning, sniffing), Lost Equipment/Theft, Physical Break-in, Social Engineering, Law Enforcement Request, Policy Violation, Unknown/Other.

Compromised System, compromised User Credentials, Social Engineering, Policy Violation

Incident Timeline

Define the following: Date and time when the incident was discovered, Date and time when the incident was reported, and Date and time when the incident occurred, as well as any other relevant timeline details.

Discovered on July 31, 2021 10:30am. Reported July 31, 2021 10:40am. Occurred on July 1, 2021 4:05pm

Incident Scope

Define the following: Estimated quantity of systems affected, estimated quantity of users affected, third parties involved or affected, as well as any other relevant scoping information.

The number of systems affected 3,000. Users affected 100. Parties involved would be 75.

Systems Affected by the Incident

Define the following: Attack sources (e.g., IP address, port), attack destinations (e.g., IP address, port), IP addresses of the affected systems, primary functions of the affected systems (e.g., web server, domain controller).

157.165.0.45, 157.165.0.25. filename additionalgameresources.zip.

Users Affected by the Incident

Define the following: Names and job titles of the affected users.

Marvin Jonson Project Manager

Section 2: Applied Learning

Part 1: Identify Additional Email Evidence

5. Make a screen capture showing the email from Dr. Evil demanding that Marvin install a keylogger.

Performing Incident Response and Forensic Analysis (4e)

Fundamentals of Information Systems Security, Fourth Edition - Lab 10

6. Make a screen capture showing the email from Dr. Evil reminding Marvin to update the firewall and scheduler.

Part 2: Identify Evidence of Spyware

12. Make a screen capture showing the three events that are related to the Actual Keylogger file in the /Windows/System32/Tasks folder with a June 30 timestamp.

15. **Make a screen capture** showing the **one event** that is related to the **Actual Keylogger** file in the **/Windows/System32/Tasks** folder with a **July 1** timestamp.

20. **Record** the date and time that the keylogger's executable file was created.

6/30/2021 at 3:00:13pm

22. **Record** the date and time when the keylogger's executable file was last started.

7/1/2021 3:54:39pm

23. **Record** whether you think you have evidence to claim that Marvin opened the keylogger.

I do have enough evidence that marvin opened the keylogger.

Part 3: Update an Incident Response Report

Performing Incident Response and Forensic Analysis (4e)

Fundamentals of Information Systems Security, Fourth Edition - Lab 10

Incident Priority

Has the incident priority changed? If so, define the new priority. Otherwise, state that it is unchanged.

It has changed to an high priority.

Incident Type

Has the incident type changed? If so, define any new incident type categories that apply. Otherwise, state that it is unchanged.

unchanged

Incident Timeline

Has the incident timeline changed? If so, define any new events or revisions in the timeline.
Otherwise, state that it is unchanged.

unchanged

Incident Scope

Has the incident scope changed? If so, define any new scoping information. Otherwise, state that it is unchanged.

New information is that Marvin was being forced to download and open the keylogger file, from Dr. Evil by him threatening him.

Systems Affected by the Incident

Has the list of systems affected changed? If so, define any new systems or new information.
Otherwise, state that it is unchanged.

unchanged

Users Affected by the Incident

Has the list of users affected changed? If so, define any new users or new information. Otherwise, state that it is unchanged.

unchanged

Section 3: Challenge and Analysis

Part 1: Identify Additional Evidence of Data Exfiltration

Make a screen capture showing an exfiltrated file in Marvin's Outlook database.

Part 2: Identify Additional Evidence of Spyware

Performing Incident Response and Forensic Analysis (4e)

Fundamentals of Information Systems Security, Fourth Edition - Lab 10

Make a screen capture showing the email with instructions for installing additional spyware.

Document the red flags in the email that indicate that it may be a phishing attempt.

a red flag would be the email, the spelling of security is wrong and it is a regular email, it does not have any ties to the organization in any way. Another flag is rushing the user to install the software, they would not do this.
